Subject: [External] SH Bell Site - Request for ARARs

Jerry,

This e-mail requests that the Illinois Environmental Protection Agency (Illinois EPA) identify all Applicable, Relevant, and Appropriate (ARARs) for the upcoming time-critical removal action at the S. H. Bell Site in Chicago, Cook County, Illinois.

Any State ARARs identified in a timely manner for this time-critical removal action will be complied with to the extent practicable. Work at this Site is tentatively scheduled to begin later this spring.

The Removal Action will address residential soil manganese contamination resulting from air deposition and transportation tracking from the S. H. Bell facility. Currently five properties are scheduled to be remediated due to elevated soil levels exceeding the RML for manganese of 5,500 mg/kg. Yards will be excavated to a maximum of two feet, backfilled and restored to pre-excavation conditions.

If you have any questions or require additional information please call or e-mail. Thank you.

Bradley Benning, OSC
